

Volume contents

Volume 81 (1996)

E. Ziomek, I. Douchet, M. Ivanova, R. Verger (Canada; Bulgaria; France) <i>Interaction of a poly(dimethylsiloxane) with triglycerides in monomolecular films and application to lipase kinetics</i>	1
T. Itoneda, S.S. Ono (Brazil) <i>Chromatographic and mass spectrometric analyses of 1-monomycoloyl glycerol fraction from Rhodococcus lentifragmentus as per-O-benzoyl derivatives</i>	11
A. Winter, W.-P. Ulrich, F. Wetterich, U. Weller, H.-J. Galla (Germany) <i>Gangliosides in phospholipid bilayer membranes: interaction with tetanus toxin</i>	21
V.V. Chupin, O.V. Ostapenko, V.N. Klykov, M.V. Anikin, G.A. Serebrennikova (Russia) <i>On the synthesis of platelet-activating factor via acetylation of 1-alkyl-sn-glycero-3-phosphocholine. Formation of structural isomer of PAF in the presence of bases</i>	35
L.I. Viera, G.A. Senisterra, E.A. Disalvo (Argentina) <i>Changes in the optical properties of liposome dispersions in relation to the interlamellar distance and solute interaction</i>	45
M.S.F. Lie Ken Jie, C.K. Lam (Hong Kong) <i>Regiospecific oxidation of unsaturated fatty esters with palladium(II) chloride/p-benzoquinone: a sonochemical approach</i>	55
C. Scheick, G. Spiteller (Germany) <i>Genesis and metabolism of 1-pentene during lipid peroxidation of ω-6 unsaturated fatty acids: metabolism of 1-pentene</i>	63
P. Mattjus, J.P. Slotte (Finland) <i>Does cholesterol discriminate between sphingomyelin and phosphatidylcholine in mixed monolayers containing both phospholipids</i>	69
O.W. Howarth, G. Vlahov (UK; Italy) <i>^{13}C Nuclear magnetic resonance study of cyclopropenoid triacylglycerols</i>	81
I.V. Grechishnikova, L.B.-Å. Johansson, J.G. Molotkovsky (Russia; Sweden) <i>Synthesis of new bifluorophoric probes adapted to studies of donor-donor electronic energy transfer in lipid systems</i>	87
Announcement	99
Preface	101
K. Gawrisch, L.L. Holte (Rockville MD) <i>NMR investigations of non-lamellar phase promoters in the lamellar phase state</i>	105
T.J. McIntosh (Durham, NC) <i>Hydration properties of lamellar and non-lamellar phases of phosphatidylcholine and phosphatidylethanolamine</i>	117
N. Janes (Philadelphia, PA) <i>Curvature stress and polymorphism in membranes</i>	133
P.K.J. Kinnunen (Helsinki, Finland) <i>On the molecular-level mechanisms of peripheral protein-membrane interactions induced by lipids forming inverted non-lamellar phases</i>	151
K. Lohner (Graz, Austria) <i>Is the high propensity of ethanolamine plasmalogens to form non-lamellar lipid structures manifested in the properties of biomembranes?</i>	167

C.D. Stubbs, S.J. Slater (Philadelphia, PA) <i>The effects of non-lamellar forming lipids on membrane protein-lipid interactions</i>	185
F.Y. Yang, F. Hwang (Beijing, China) <i>Effect of non-bilayer lipids on the activity of membrane enzymes</i>	197
L. Chernomordik (Bethesda, MD) <i>Non-bilayer lipids and biological fusion intermediates</i>	203
R.B. Cornell, R.S. Arnold (Burnaby, Canada) <i>Modulation of the activities of enzymes of membrane lipid metabolism by non-bilayer-forming lipids</i>	215
J. Wegener, H.-J. Galla (Münster, Germany) <i>The role of non-lamellar lipid structures in the formation of tight junctions</i>	229
